

Environmental Protection Policy

AET regards the protection of the environment as an integral part of its business and we are committed to deliver all our services in an environmentally responsible manner. AET aims to minimise the potential impact on the environment through every facet of its operations.

AET Objectives:

- AET will manage our vehicle fleet in harmony with the ACT Government's Green Vehicle Initiative where AET will replace old vehicles, as needed, with newer vehicle models in order to decrease vehicle emissions, vehicle noise and fuel consumption;
- We will support and adhere to environmental agreements and commitments entered into by our clients;
- We will conduct business with suppliers who have a pledge to responsible environmental management;
- We will maintain and follow our systems and processes to responsibly dispose of waste, collect and dispose of prescribes substances (PCBs) and to recycle certain components and materials (fluorescent tubes).
- We will actively promote practices and installations that minimise waste and promote energy efficiency
- We will do a thorough site inspection for environmental hazards in order to Identify, mitigate and improve the environmental impact of its operations;
- Employees and contractors will be authorised to cease work and notify their Supervisor if they believe their activities are creating a significant environmental impact.

AET will continue to review its Environmental Protection Policy and procedures to ensure that it meets the changing demands of its clients, staff, the community and governments in the achievement of more responsible environmental management. All employees and contractors will be trained and educated in the objectives of this policy and full compliance is expected.
